VISITS THE USSR

# POLITBUREAU WEEKLY MEETING

The Polithureau of the CPSU Cantral Committee has axamined the Draft Guidelines for Economic and Social Development of the USSR from 1986 to 1990 and up to the year 2000.

It was stressed that the preparation for the 27th CPSU Congress of the document which delines the main tasks of the national economy, is of special importance. These lasks will sorve as foundelice for drawing up plane for the Twelfth Pive-Year Plan end delining the most important long-term diractions of economic and social development of the Soviel ecclety. The Draft Guidelines will envisage more rapid development of all branches of the national aconomy, greater intensitication of production, speeding up of eciantific and technological progress, and consolidation of the aconomic and defence potential of the country. A broad social programme is being outlined to encompass all aspects of the life of Soviet people. Cooparation between the Soviet Union and the fratarnal socialist countries, particularly in the sphere of actantific and technological progress, specialization and joint afforts to production, will be further advanced,

#### The Pentagon wants more Pershing-2s... in West Germany

el a secret American hasc in Wellerhach in the lend of Rheloland-Plaiz. Over a short period of time thay can ha brought to a state of combat raadinese and launched against the targets they are aimed at. This explains why the Pontagon has asked the Martin Marietta Corparation to build many more trenshings. than the 108 under the NATO decision.

The real plans of those who champton NATO's missile decisions have been exposed by the influential West Garman mogazine, "Siern". It has in its possession a secret American initiary document maoual of operation of the Pershing-2.

The manual, writes the magazine, confirms all the apprehensions linked with the deployment of those

missiles in West Germany.

From the manual it follows that three-fourths of the Pershing-2s on West Garman soil rarry nuclear warheads. Each second missile is in a state of consiani combai resiliness, which means that at any moment it is ready to deliver its initial cargo to a larget. The missiles' components are stored at a depot in Wellerbach. "Siern" notes that this testifies to the fact that in addition to the 108 Parabings, the Pentagon is building up a solid reserve of mis-siles in West Germany which after a short time can be brought to their launching pads.

machine, leaving the sarewartyes.

#### Angling luck

FROM the SOVIET PRESS

The chorus at those who poteon the oir waves has onether addition from the American special savices, wittes PRAVDA. A station which has been sucrilegiously dubbed "Radio Morti" has begun broadcusting against sacialist Cuba from the state of Flatida.

The present subotage action by Washington sirikes one

The present ambotage action by wearington attines one with its particular cynicism. It represents dishonest capitalization on the name of the ravalutionary pointed loss Marti and is a hyperitical linkage hetwoen the apening of the radio station and the 83rd anniversory since the United States with

drew its large of occupation fram Cubo. If also represents o

brozen buvado that the shatles and ironsmitting facilities de not belong to the counter-revolutionary emigres, but to the official Voice of Americo, which officedly guaroniess steries

The very liest programmes at the anti-Cubon radio atation have cantituded that there will be no stertilly of information, but revealed the dirty, standerous character of the new mouthpleco of American opent provocofeurs. In this respect, it is a livin of other subversive centres like the CIA-controlled Radio Liberty and Radio Pree Burape. The "radio war" unleashed by Woshington against Cuba is another graphic indication of who is responsible for families up international tensions.

Whereas South Airica itself has turned into a springboard for training, equipment and sending of ormed gangs into the neighboard state, the centre far political activity and roluge of the heads of the counter-revolutionary riff-roll, porticularly from the notorious Mozomhique Notional Resistance (MNR), is in Portugol, writes IZVESTIA. Howing found residence in expensive holes, these heads instructed by international impopulate circles have storted work on pions to subvert the commy of the young African stoles and destabilize their internal situation by means of a mod attacks and subolare.

connamy of the young African stoles and destabilize their internal situation by means of armod actucks and subotage.

From documents discovered riving rolds on MNR bases in
vorteus parts in Mozambiquo, from testimony of captured
ynagsters and from other information it follows that Portuguese cittzens are also tuking part in these acts of terrorism.

The public in Mozambiquo and other countries have
repeatedly protested against the activities of counter-revolutionary groupings' members on Portuguese soil. In Lisbon
promises have been given that these vipars nests of counterrevolution would be closed down, tlawever, those promises

revolution would be closed down. However, those promise remain uninitalical.

in Europe and Japon it is now apenly said that a "tech-

nalogical wor' has been unleasted against its styles by Woshington which has hypocritically comoullaged its actions with a smoke screen of the light against technological leaks to the Eost, writes EKONOMICHESKAYA GAZETA.

At present, the total acientific and technological potential of Japan and Western Europe has come up to the level of the

American potential, and in some areas of advanced tachnolog-

tes it has even outstripped it. In such important areas of pro-

duction as optical line, computer olements, semiconductors, hiotechnology, and others the technological tovel of the loreign enterprises is higher than in the United States. As o

result, the American manapoles are losing ground on international markets. Over the past decade the share of the United States in the exports of high technologies in the capitalist world has shrunk from 27 to 23 per cent. This shrinkage has been more topid than the decrease in the American shore in the total exports and has been characteristic of most types of high technology are distingting to this shrunking.

high iechnology products. In this situation a new economic war unleashed by the Penlogon alcosty tachs like a response by the American big business to this technological challenge from Jopan and Western Europe.

The newspaper TRUD writes that in the present alluation

Yevgeny RUMYANTSEY

Friendship for the sake of peace

During his recent official friendly visit to the Soviet Union the Indian Prime Minister, Rajiv Gandhi, was accorded a cordial welcome in Moscow, Byelorussia and Kirghizia. His meetings with Soviet leaders were marked by friendship and matual un-darstanding. He was walcomed as a representative of a friendly nation, just es wa ased to meet his grandfathar sawaharlai Nehru and mother, Indira Gondhi, who did so much for the cause of Saviel-Indian Irland-

Meetings between Soviet end indien laadars ere a good tradi-tion, and each of them is like e ummit from which breader horizens of the future open up. In this respect very algorithment for the expansion of bilateral links ware egreements, signed during the visit, on the main areas of irade, aconomic, scientific and fechnological cooperalism up lo the year 2000 and on the establishment of several prejects in India, some of them crucial lor the development of the cour-

hy's economy and strangthaning

Its delance potential on the threshold at the new confury.

Yhe Indian Prime Minister's visit graphically showed the high dograe of trust between the two nations and the durability of their relations, which make it possible to draw up the next century logether. One indication of this was that the participents in the talks racifirmed the great significance of the Treety of Peace, Friandship and Cooperation between the Iwa upon which new storeys of the edifice of Soviet-Indian Irland-

ship will go up. Neiurally, due attention was given to the world stuellon. The exchange of views again revealed the similarity or closenoss of views on major internetional is-sues, especially the preservellon of peace and alimination of the

nuclear threat. Nuclear death does not request a passport. Il ceres noth-ing about nationality or Hie H-self. There can be no winners In a nuclear war, nor can there be impenetrable defences

ageinst nuclear weapons. Thosa words of Rejly Gandhi lastily to e serious concern over world tansions and are, at the same time, an indictment of those time, an indiction of inco-planning "star wars" under the cover of "stratagic defance ini-tiativa". The nuclesr threat, he stressed, is engendered by the

peace and prevent a nuclear war has tremendous significance that can runie all peace-loving torces. The Soviet-Indian Sum mit showed that like unity of the USSR and India, which lead the socislisi community and the non-alignment movement ls. in this respect, on example end a tive factor in the ersenal of

same weepons which ere crealed in the name of "security". The Seviet Union and India amphasized, too, the need to and the arms race on earth and to prevent it from gelling into The nead to achieve lasting

the drive for peace.

Yhe USSR end india also sounded anxiety over mounting tensions in the Asian-Pecific region due to imperialist policies. They stressed that a volatile sit-

Ocean owing to growing US military presonce and confirmed military presence and confirmed their support for the idea of turning this region into a sone of peace and holding an international forum to achieve this objective. The only way to seltle the situation in South-East Asia, both sides stressed, is through a constructive dialogue of the countries involved.

The talks apanned all regions of the planet, with the main focus on Asia. Being both a European and an Asian nation, the USSR, like other countries an thought the supposed of the countries on the countries of the planet, with the main focus on Asia.

USSR, like other countries on the conlinent, is as much interested in creating en almosphere of peace and cooperation there. The Soviet Union bellaves, Mikhall Gorbechay strossed al a dinner in honour of Rejly Gandhi, that one might consider, goneral comprehensive approach to the problems of security in Asia and railying efforts of Asian states to this effect. This cluding the holding of a pen-Asian forum to compare notes and jointly search for positive

Significently, Soviet-Indian re-ialions are en example of such a constructive attitude to Asien affairs. The Soviet-Indian Summi is a new striking demonstration of the two countries' lesting friendship and responsibility to mination to work together for the peaceful fulura of mankind. As Rajiv Gandhi vividiy remerked, we are all a single temily of people and indian-Soviet friendship is precisely to serve this community of peoples.

#### SCORPION VENOM IN PHARMACOLOGY

by M. Gupio.

Scientisto in Baku, copilal of Azerbeijan, use an uauauol me-ihod ol collecting acorpion ve-nom — e voluoble pharmoceulicol product: they use electric pulses to ochieve coollououa se-cretion of venom.

The cliect of the scorpion venom is so lar little aludied. fi is only known that in anilquity it was used successfully to cure pervous hreakdown. Al present research institutions in the USSR ore studying the venom's effect on the buman organism for the purpose of developing new me-dicinal preporotioss. ANTIQUE STATUE FROM CRIMEA Soviet resioners have pul

gether an enlique piece of sta-lue. They assembled the 60-cen-limetre female figuriae from iens of larra-cotta shards. Its beautiful face is crowned with a holf-moor shaped diodem. It has an elaborate bairdo and the foldings of its chiton are ireated in much detail.

The broken figurine was discovered by an expedition of archaeologists from Leningrad while digging encient liuratum, one of the cities of the Bosporus Kingdom, is the 1st to 3rd centuries A. C. the kingdom was a peculiar melting pol for cuttoms, beliefe sod artistlo traditions of Greece, Rome and the aomadic Soythians and Sarmatians. The figurine was found in double-chamber underground tunnel with an altar. This prompts the ballef that it represented a goddess, most likely Aphrodite. Art historians say that the Crimeao find resembles covered by an expedition of archaeologists from Leningrad white digging encient liuratum, one of the cities of the Bosporus Kingdom, la the 1st to 3rd that the Crimeao find resembles the best specimens of Hellenistic staluary in its dynamics, works manship and precision in the treatment of detail. It is quite possible that Aphrodits of fluratum is a copy of a lost or still unknown masterplece at par with Victory from Samothrace, the great Altar of Zeus at Pergamum end the statue of Laocoon.

#### VIEWPOINT

## Third semester of Soviet students

Every year daring summer holidays ohout 800,000 Soviet students fold the student can-struction leams (SCT). This voluniery movement clarted in 1959 by 339 studenie from the physics department of Moscow University, is called the "third semester". Over the pest five years under it students have doos johs worth approximately 7,000 millon roubles.

This to quite setticleat i build a modern medium-sizo city, Viktor PRISTUPKO, who is constantly octive to eludent building feams and now head of its ceolrel headquarters in Moscow, fold MNI.

Q: Whet branches of the se lionol eccaomy are most popular with the members at the SCT in

A: Generally spooking, these teams work an different projects of 50 minietries and departments. As for popafarity, I sholl airess that young mao oad won-en ara trying to epead their "third semester" on major eco-nomic projecto, betp in those seeds their hende and capabilit les most. For example, ohoul 150,000 sindenlo work every summer to such major brenches os construction of ogricultural and land reclamation fecilities in the Non-Black Soil Zoos of he Russian Pederation.

Ot Whel wilt the "third se-meder" look like in 1905† Whal aro lis main features

At The first disliaguishing tee lure is facreased specialization.
Every year more and more sludeots work daring the holideys
to their luture lietds at traioing.
More than 160,000 aludents ore expected to work this summe in each learns. In other words, almost every fifth will put tolo preciles the theoralical knowledga ohialoed dariag the academic years fulars builders will boild, agroaomisla will deal with harvesis and so an.

Q: During the academic seme-sters students receive stell atlowace. Whet da they gal during the "third samester"?

At Pirstly, sindenis raceive grants ell the year roaod, including vacations. Secondly, work is student teams in also paid for and their earnings, in nol subject to taxalloa.

Or Does the material tactor acrea as the main silmatus for e cludent wha decides to jain the eludent buildiag faem?

D

A: Sociological polls give the

One more point. Within the SCT today is an increasing number of the so-called teams of gratulious lebour. I.e., those which transfer their earnlags to various public funds. For example, they donste the money they earn to the Soviet Peace Pand, in the summer of 1984 all student feams, without exception worked one day free of charge for the Fund of the 12th World Peetival of Youth and Students, which will be held in Moscow from July 27 to August 3 this year.

#### FROM the SOVIET PRESS

#### KIRGHIZIA — MAJOR ELECTRICITY PRODUCER

Kirghizia fa Soviet republic in Central Asia), which was formerly reputed to be an "energy outlying oreo", is now building one hydropower stotion after another and already tronsmits ourplus electricity to neighbouring Central Asian republics, writee PRAVDA.

The tepublic has mighty rivers, rushing down the summits of Tien Shan ond Pamiro-Alfol. Noture tiscit made the republic a producer of electricity. Of apeciof interest for hydroenginesrs is the Noryn River. Its power potential curpasses such big rivers on the tripph

Hydraulic engineers or successfully devoloping this main river of Kirghizia. The Al-Bachi, Uch-Kurgan, Tokiogui, Kurpsai hydropower atolions have ofreedy been built on it, and in 1985 the its unit of the Tash-Kumyr hydrostotion now under construction, will clori generoling current. As soon as the construction of the Shamaldy-Sal station to completed the Nizhne-Noryn hydropower cascode will be fully put into operation. The Central Noryn is olso being developed while

the possibility of building power slottens on other riv-

#### GEOLOGY: PROGRAMME FOR THE FUTURE

ors is being worked out.

Not long ago the Polithureau of the CPSU Central Committee opproved the programme of geological prospecting for oil and gas. By the way, writes IZVESTIA, the share of prospected oil and gos resources is very high lodgy. Hawdyer, this relate, above all, to

the richest oil and gas Italds. They are easier to discover ond operate, with comporatively amoil expenses. But there are smaller deposits and, usually, at a greater distance from populated areas and communications. To detect them, it is necessary to search for them over o prooder orea and with a more frequent network of drifling rigo. Besides, these deposits occur not only in remote oreas but olso or deeper toyers. Moreover, further penetrotion into deepar toyers will encounter the realstonce of oggressive medior hydrogen sulphide and carbonio ocid. Thair impost moy be dangerous for equipment, people and nature. Hence, more exacting domanda ore placed upon the equipment developed in such hronches on non-letrous metallurgy, heavy mochinc-building, machine-building for the oil and chemical

Therefore, it is necessary for goology, relying on new equipment, electronics and mothemotical methods of islotmation processing, to became o more modern bronch and, as a science, more occurate, the eliciency will be greater and it will enouse a higher growth of oll and goo reacryac. This will be achieved as a result of the implementation of the new programme.

#### EVERYONE HURRIED TO THEIR AID

Donelak miners proved to be stronger than the occident. They ireed from a cione pricon workers of the new Krasnormelskoyo-Zapod nayo No. 1 mino. By order of the USSR Minister of the Cool Industry they have been precented with Miner's Glory honorory hodges for their courage, initiative and resourcefulness,

What happened of the Krasnoormelokaya-Zapadnaya mines As o result of o mine shock which was impossible to torecast, ehitis in the rock mass took place, pressure went up and the stull could not stand it.

Rescue miners, occompanied by o doctur, climbed

他们是是他们的人的人的人的人的人的人的人

down into the mine one ofter another. Somewhat in the emergency goo onotyper loborolary descended the the mine. Samples were taken and reports about the content of methons and carbon diaxide in the sir wire after

The reports were oforming. The alone bag between the obstruction and the deed end, in which is people were tropped, was being litted with gas. Now every thing depended on the rescuero. They disconnected implication on coupled it with ventiloiton duci. Als care pipeline and coupled it with ventiloiton duci. Als care in through the obstruction. The rescue operation laded in through the obstruction. The rescue operation laded in the line peeded by mineral to call the peeded by the peeded 32 hours. This was the time needed by miners to cul through an obstruction of 21 metrec.

#### Filming Victory Parade

The filming crew of the Central Documentary Studios have begun shooting a full-length lilm, "The Victors". The crew will work in the Brest (Hero City) Fortress end near Yetnya and Prokhorovka on tha Kursk Bulge. where the major battles of tha war ware fought. The film covers many events which occurred lorty years ago, with rare rtes and songs. The main iheme of the film, however, is today's

llie of the war veterans. With soveral heroes selected for the film, the euthors are tracing their lives from that day to sum-mer, 1245, when they were met as victors at the Byatorussten railway station in Moscow to the 1985 Victory parade in Red

In the film, this year's Victory parade will be shown together with the famous Victory parade at the end of the war - June

revolutionory movement to the

end of his life. The life ond work of the post are traced

against the background of

avents in Russis's social, socio-political life between 1910 and 1930. People with whom life brought Mayakovsky in coetact at different periods are also

mentioned. These joclude writer

Maxim Gorky, psinter Ilya Repin

and poots Sargel Yesenin and

Alexander Blok.

#### Swedish novel about Vladimir Mayakovsky

"I Am Burning" is the title of a novel by the famous Swadish prose-writer Torbjörn Säfve recently published by the Priama Publishers of Stockholm.

The main character in the novel is an outstanding Soviet poet, Vladianir Mayakovsky. The lovel could well ha antitled, "About Timo end Mysslf", because the narretive is in the parson of the poet who tells the etory heguming with his adoles-conce and his list steps in the

#### EACH SATURDAY AT FIVE

Henceforth, on every Setur-day, brass bands will entertain Muscovites and guests of the capital on the higgest thirtysaven open-air grounds.

There ere many professional and emateur folk brees bands throughout the country, with more than one hundred in the esplial alone.

Many work collectives have their own bands, and the bono-rary utilo of "folk hand" has hash confarred on many of them. The best amataur orchestras at the Palace of Culture of the Li-khachov Motor Works, Pelace of Culture of the Lenin Komsomol Car Works, Palace of Culturs of the Prozhektor fectory and one of the oldest compa-

lace of Culture of the Vladimir Ilyich Plant-will participate in the Saturdey concorts.

The thirst of people for such nusic and open-air performan-cos is enormous. Now the dreams will come true for this kind of music will resound in Tvarskoi Boulevard and in Re-pin Square, hear the mooument to Isrmontov, and in a public garden at the Vosstaniya Square. Familiar malodies of military orarchas and waitzes, tha best works of Russlan, Soviet and foreign composers will he played by the best hrass bands of Mos-

# 'Illusion'—university of world cinema

This cosy cinama is situated in the very hearl of the Sovial capital — one kilometre south of the Kremlin and a couple of steps from the Moskva River. Callad "Illusion", it is a sort of Illim library where chapters from the history of world cineme are shown. Thanks to the USSR Stele Film Fund and 30 loraign archives and cinemataques, "lijusion" reper-tory is much broader than in ordinary commercial cinemes. Many of the films which the USSR Film Fund receives under axchange schomes from other countries ere shown only et "Illusion".

WHAT DOES ITS SCREEN OFFER!

Lal us look at some of the tilms shown here during one month: "About Nica" (France, 1929), "A Chronicla of Lova" (Italy, 1950), "Doctor Kaligari's Study" (Germany, 1919), "The Naw Bahylon" (USSR, 1929), "Pinocchio" (USA, 1940), "Godzilla" (Japan, 1954), "Faux Pas" (Wast Germany, 1974), "The Carnival" (USSR, 1981), "Kramer vs Kramer" (USA, 1978), The "Illusion" posters announce lilms which can meat vary diversa lastes.
"Illusion" is the only closure in the world at which

"Illusion" is the only ciname in the world at which every spaciator can get all kinds of consultations on the history of cinema. On its scholarly sloff era ex-perienced film historiene end critics.

#### CINEMA UNIVERSITY

9

Dear Comrades. t can take my leave in July, August, or Seplember and, like in the previous years, I will come to Moscow to see ilims at "illusion". The things I am interestad in are the "new weve" in West German cin-estad in are the "new weve" in West German cin-ema, italian political productions of the 70s, refco-spective showing of films by 8srgman, Anionioni, Follini, Coppole, Resnels, and Sariolucci, Will you ploate tell me what cyclos you are going to show during these three months so that I could plan my leave exceedingly?

This latter came from engineer Igor Sviridov of Viedivostok, ten thousand kilometres east of Moscow. His letter is one of many hundreds received el

Arrangement of cycles of films is the main type of Arrangement of cycles of films is the main type of work with speciators. Here ere e faw of these cycless Masters of Film Diraction, Masterpieces of Silent Movias, Musicals, The World of Sci-Fil and Adventures and Popular Actors. Their subscriptions enable those concerned not only to see the films, but also to fisten to lectures at which film historians telk about the Illm's idees, and the art of those who made it. The lectures are usually clean by famous made it. The lectures are usually given by famous film critics or directors. Among those who have ad-

dsossad audiencas et "illusion" were Akira Kurosewa, Stenlay Kremer and Gluseppe Da Santis.

The most popular cycla et "Illusion" is a three-year Cinema University, People seaking admission go through a stringant lest, as there are usually live or six contestants for one place. Although the University Issues "graduates" with no diplomes, and trains no professional film critics, many ganuine cinema fans come hare to improve their knowledge about cinema. aboul cinema.

about cinema.

The irequanters of "I(lusion" are people of different works of ille. The enthusiasis are very active. A permanant exhibition in the foyer, "From Our Grandmothers" Albums", hes hundreds of old postards solected by the visitors who also bring old postars, Amateur photographers donated dozens of photographs of world-famous ectors and directors displayed on the wells.

## Indo-Soviet cooperation: an international example

Thirty years ago, when tha Soviat Union eod India ware about to sign their first agraement on large-scala economic cooperatioo, Bhilai, a town oo an arid and barren plalo in Madhya Pradash state, was tittle known even in india ttself. Today, it is o glant industrial city known throughout the world. This "lirstling" of the Soviet-indian cooperation occupies a key position oo the industrial mep of India. However, of no less importance is the sociat affact of the construction of such tn-dustrial giants. Each tonne of

#### GDR's technical centres

The GDR complexes like Fortschritt Laodmaschinen, MLW intermed Export-Import, Ceri Zeiss-Jona have haen increasing the volume of their exports to the Soviet Union - agricultural

machines, medical aguipmeni, optical instruments, and computar technologies.

A short time ago, three industries opened naw centres in G. Dimitrov Sireet, Moscow. The production mitrov. Sireet, Moscow. The pro-duction sooms and specialized workshops will make it possible to expand guarantes services of technologies and equipment ex-ported from the German Demo-cratic Republic. An increase is also enviseged in the number of Soviet apecialists trained et the technical centres; of the three

the Bhilai staal crestes one job in the place it goes. In this way, the complex annually provides work for nearly two and a baff

million people.

Over the past threa decades, fifty-eight industrial projects have been huilt in India with Soviet assistance and another thirty are either at the blueprint staga or undar construc-

Why have the Soviet-Indian lioks become something of an international standard? Answering this question to a recent interview, the Indian Prime Minister Rajiv Gandhi sald: "Our relations have always been good, and we would like to cootinue to devalop them. We are linked by bonds of friend-ship which hegan a long time ago. In e sense, it hegan even before this country became independent. After ell, Parlioment and the Indian National Congress followed with great inter-est the revolutionary transfor-maticos in the Soviet Union end the development of the Soviat Union Itself. Late: the Soviet Union itself. Lates the Soviet Union became our major partner in the creation of our national industries and the devolopment of our heavy industries. When difficulties exose in our relations with cother countries, our Soviet partners helped us eract steel mills and implement major, development projects. Our friendly relations rose to a new level with the atoning of Our iriendly relations to a to a new level with the algning of the Treaty of Friendship, and since then they continue to edvance. I hope that our irrendship will continue to grow from stratgth to strength in the in-
